

VOLUME CONTENTS (VOLUME 63 2000)

<b>Fatty acid metabolism in neurodevelopmental disorder: a new perspective on associations between attention-deficit/hyperactivity disorder, dyslexia, dyspraxia and the autistic spectrum</b>	<b>1</b>
<i>A. J. Richardson, M. A. Ross</i>	
<b>Epidemiology of neurodevelopmental disorders in children</b>	<b>11</b>
<i>J. Little</i>	
<b>Red blood cell fatty acid compositions in a patient with autistic spectrum disorder: a characteristic abnormality in neurodevelopmental disorders?</b>	<b>21</b>
<i>J. G. Bell, J. R. Sargent, D. R. Tocher, J. R. Dick</i>	
<b>A sibling-pair based approach for mapping genetic loci that influence quantitative measures of reading disability</b>	<b>27</b>
<i>C. Francks, S. E. Fisher, A. J. Marlow, A. J. Richardson, J. F. Stein, A. P. Monaco</i>	
<b>Autistic spectrum disorder: diagnostic difficulties</b>	<b>33</b>
<i>G. S. Jones</i>	
<b>Increased levels of cytosolic phospholipase A2 in dyslexics</b>	<b>37</b>
<i>L. E. F. MacDonell, F. K. Skinner, P. E. Ward, A. I. M. Glen, A. C. A. Glen, D. J. Macdonald, R. M. Boyle, D. F. Horrobin</i>	
<b>Autism as a neurodevelopmental disorder affecting communication and learning in early childhood: prenatal origins, post-natal course and effective educational support</b>	<b>41</b>
<i>C. Tovarthen</i>	
<b>Gene targets related to phospholipid and fatty acid metabolism in schizophrenia and other psychiatric disorders: an update</b>	<b>47</b>
<i>C. N. Bennett, D. F. Horrobin</i>	
<b>Could oxidative stress be a factor in neurodevelopmental disorders?</b>	<b>61</b>
<i>M. A. Ross</i>	
<b>Potential diagnostic aids for abnormal fatty acid metabolism in a range of neurodevelopmental disorders</b>	<b>65</b>
<i>P. E. Ward</i>	
<b>Fatty acid deficiency signs predict the severity of reading and related difficulties in dyslexic children</b>	<b>69</b>
<i>A. J. Richardson, C. M. Calvin, C. Clisby, D. R. Schoenheimer, P. Montgomery, J. A. Hall, G. Hebb, E. Westwood, J. B. Talcott, J. F. Stein</i>	
<b>Dyslexia in adults is associated with clinical signs of fatty acid deficiency</b>	<b>75</b>
<i>K. E. Taylor, C. J. Higgins, C. M. Calvin, J. A. Hall, T. Easton, A. M. McDaid, A. J. Richardson</i>	
<b>The potential role of fatty acids in attention-deficit/hyperactivity disorder</b>	<b>79</b>
<i>A. J. Richardson, B. K. Puri</i>	
<b>Visual function, fatty acids and dyslexia</b>	<b>89</b>
<i>K. E. Taylor, A. J. Richardson</i>	
<b>The role of long-chain polyunsaturated fatty acids in infant cognitive development</b>	<b>95</b>
<i>P. Willatts, J. S. Forsyth</i>	
<b>Genetics of specific language impairment</b>	<b>101</b>
<i>J. Nasir, W. Cohen, H. Cowie, A. Maclean, J. Watson, J. Seckl, A. O'Hare</i>	
<b>The neurobiology of reading difficulties</b>	<b>109</b>
<i>J. Stein</i>	

<b>Draft recommendations on the Essentiality of and Recommended Dietary Intakes for Omega-6 and Omega-3 Fatty Acids</b>	117
<b>Workshop Statement on the Essentiality of and Recommended Dietary Intakes for Omega-6 and Omega-3 Fatty Acids</b>	119
<i>A. P. Simopoulos, A. Leaf, N. Salem Jr</i>	
<b>Commentary on the Workshop Statement</b>	123
<i>A. P. Simopoulos</i>	
<b>Commentary on the Workshop Statement</b>	125
<i>W. E. M. Lands</i>	
<b>Commentary on the Workshop Statement</b>	127
<i>C. Galli</i>	
<b>Commentary on the Workshop Statement</b>	131
<i>M. A. Crawford</i>	
<b>Commentary on the Workshop Statement</b>	135
<i>A. J. Sinclair</i>	
<b>Commentary on the Workshop Statement</b>	139
<i>S. C. Cunnane</i>	
<b>Commentary on the Workshop Statement: Are we really sure that arachidonic acid and linoleic acid are bad things?</b>	145
<i>D. F. Horrobin</i>	
<b>Radioimmunological measurement of F<sub>2</sub>-isoprostanes after hydrolysis of lipids in tissues</b>	149
<i>E. Södergren, B. Vessby, S. Basu</i>	
<b>Opposing effects of prostaglandin E<sub>2</sub> and F<sub>2α</sub> on rat liver-associated natural killer cell activity in vitro</b>	153
<i>H. Liu, J. E. Cunnick, S. Hendrich</i>	
<b>The effects of combined conventional treatment, oral antioxidants and essential fatty acids on sperm biology in subfertile men</b>	159
<i>F. H. Comhaire, A. B. Christophe, A. A. Zalata, W. S. Dhooge, A. M. A. Mahmoud, C. E. Depuydt</i>	
<b>Effect of experimental diabetes on the fatty acid composition, molecular species of phosphatidyl-choline and physical properties of hepatic microsomal membranes</b>	167
<i>R. R. Brenner, A. M. Bernasconi, H. A. Garda</i>	
<b>Why is glycated LDL more sensitive to oxidation than native LDL? A comparative study</b>	177
<i>G. Sobal, J. Menzel, H. Sinzinger</i>	
<b>A direct method for the simultaneous measurement of ceramide and phospholipase D activity</b>	187
<i>G. Liu, L. Kleine, R. L. Hébert</i>	
<b>Nutritional status and intermediate chain-length fatty acids influence the conservation of essential fatty acids in the milk of northern Nigerian women</b>	195
<i>E. Knox, D. J. VanderJagt, D. Shatima, Y.-S. Huang, L.-T. Chuang, R. H. Glew</i>	
<b>Correlation between the content of intermediate chain-length fatty acids and copper in the milk of Fulani women</b>	203
<i>J. T. Shores, D. J. VanderJagt, M. Millson, Y.-S. Huang, R. H. Glew</i>	
<b>Urinary prostaglandin excretion in pregnancy: the effect of dietary sodium restriction</b>	209
<i>F. M. C. Delemarre, C. M. G. Thomas, R. J. van den Berg, H. W. Jongsma, E. A. P. Steegers</i>	
<b>Thromboxane-B<sub>2</sub> levels in serum of rabbits receiving a single intravenous dose of aqueous extract of garlic and onion</b>	217
<i>M. Thomson, T. Mustafa, M. Ali</i>	

<b>Prostanoid receptors in intestinal epithelium: selective expression, function, and change with inflammation</b>	223
<i>V. Takafuji, R. Cosme, D. Lublin, K. Lynch, J. K. Roche</i>	
<b>Keloids in rural black South Africans. Part 1: general overview and essential fatty acid hypotheses for keloid formation and prevention</b>	237
<i>L. Louw</i>	
<b>Keloids in rural black South Africans Part 2: dietary fatty acid intake and total phospholipid fatty acid profile in the blood of keloid patients</b>	247
<i>L. Louw, A. Dannhauser</i>	
<b>Keloids in rural black South Africans. Part 3: a lipid model for the prevention and treatment of keloid formations</b>	255
<i>L. Louw</i>	
<b>Effect of nifedipine in cyclosporine-induced nephrotoxicity in rats: roles of the thromboxane and endothelin systems</b>	263
<i>I. E. Darlametsos, E. N. Papanikolaou, D. D. Varonos</i>	
<b>Hemostasis and fibrinolysis in patients with intermittent claudication: effects of prostaglandin E1</b>	271
<i>Claus Weiss, Silke Regele, Tamás Velich, Peter Bärtsch, Thomas Weiss</i>	
<b>Polyunsaturated fatty acid status of Dutch vegans and omnivores</b>	279
<i>M. R. Fokkema, D. A. J. Brouwer, M. B. Hasperhoven, Y. Hettema, W. J. E. Bemelmans, F. A. J. Muskiet</i>	
<b>Short-term supplementation of low-dose <math>\gamma</math>-linolenic acid (GLA), <math>\alpha</math>-linolenic acid (ALA), or GLA plus ALA does not augment LCP<math>\omega</math>3 status of Dutch vegans to an appreciable extent</b>	287
<i>M. R. Fokkema, D. A. J. Brouwer, M. B. Hasperhoven, I. A. Martini, F. A. J. Muskiet</i>	
<b>Effect of the extract of Ginkgo biloba (EGb 761) on the circulating and cellular profiles of polyunsaturated fatty acids: correlation with the anti-oxidant properties of the extract</b>	293
<i>K. Drieu, R. Vranck, C. Benassayad, M. Haourigi, J. Hassid, R. G. Yoa, J. R. Rapin, E. A. Nunez</i>	
<b>Docosahexaenoic acid is a potent inducer of apoptosis in HT-29 colon cancer cells</b>	301
<i>Z. Y. Chen, N. W. Istfan</i>	
<b>Association of lipoprotein(a), prostaglandin I<sub>2</sub>-synthesis stimulating plasma factor, biological half-life of prostaglandin I<sub>2</sub> and high-density lipoproteins in HIV-1 infection of different stages</b>	309
<i>H. Kritz, J. Ethimiou, J. Stamatopoulos, Claudia Najemnik, H. Sinzinger</i>	
<b>Expression of cyclooxygenase-2 and nitrotyrosine in human gastric mucosa before and after <i>Helicobacter pylori</i> eradication</b>	315
<i>A. Kimura, S. Tsuji, M. Tsujii, H. Sawaoka, H. Iijima, N. Kawai, M. Yasumaru, Y. Kakiuchi, Y. Okuda, Z. Ali, Y. Nishimura, Y. Sasaki, S. Kawano, M. Hori</i>	
<b>The effect of supplementation with docosahexaenoic and arachidonic acid derived from single cell oils on plasma and erythrocyte fatty acids of pregnant women in the second trimester</b>	323
<i>S. J. Otto, A. C. v. Houwelingen, G. Hornstra</i>	
<b>Synergistic interaction between thromboxane A<sub>2</sub> and mildly oxidized low density lipoproteins on vascular smooth muscle cell proliferation</b>	329
<i>S. Koba, R. Pakala, T. Watanabe, T. Katagiri, C. R. Benedict</i>	
<b>Influence of insulin on the metabolism of glucose in uteri isolated from ovariectomized and non ovariectomized underfed rats</b>	337
<i>S. M. Casalino-Matsuda, J. A. Linares, L. M. Campos, A. Goldraij</i>	
<b>Adenosine induced direct negative inotropic effect is abolished during global ischemia: role of protein kinase C and prostacyclin</b>	343
<i>G. K. Orij</i>	

<b>Beneficial effect(s) of n-3 fatty acids in cardiovascular diseases: but, why and how?</b> <i>U. N. Das</i>	<b>351</b>
<b>A combination of lactacystin and 12-O-tetradecanoylphorbol-13-acetate enhances the release of arachidonic acid from cells in cultures: release is reduced in confluent and serum deprived cells</b> <i>L. Levine</i>	<b>363</b>
<b>Lactacystin stimulates arachidonic acid metabolism in rat liver cells: effects of cell density on arachidonic acid release, PGI<sub>2</sub> production and cyclooxygenase activity</b> <i>L. Levine</i>	<b>371</b>
<b>COX and LOX eicosanoids modulate platelet activation and procoagulation induced by two murine cancer cells</b> <i>M. E. Pasqualini, C. E. Mohn, J. P. Petiti, P. Manzo, A. R. Eynard</i>	<b>377</b>
<b>Dietary long-chain fatty acids and visual response in malnourished nursing infants</b> <i>M. C. Marín, G. E. Rey, L. C. Pedersoli, M. A. Rodrigo, M. J. T. de Alaniz</i>	<b>385</b>
